EDUCATION

Dronacharya College of Engineering, Gurugram **2023 – 2027**

*B. Tech in Computer Science and Engineering with Specialization in AI and ML - **CGPA**: 8.20*

Jawahar Navodaya Vidyalaya, Devrala, Bhiwani

- *Central Board of Secondary Education - Class XII - **Percentage – 80%*** ***2022***
- *Central Board of Secondary Education - Class X - **Percentage - 93%*** ***2020***

EXPERIENCE

SoftKiwi Technologies – AI/ML Intern |June 2025 – July 2025 | Gurugram

1. Designed and deployed a **Customer Churn Prediction Model** achieving **87% accuracy**, improving client retention by **15%**.
   - Processed and analysed **10K+ customer records**, optimizing model runtime by **30%** through feature selection and tuning.
   - Implemented **feature selection** and **hyperparameter tuning**, reducing model training time by **32%** and improving **F1-score by 18%**.
2. Developed an **AI-powered Social Media Analytics System** that processed **52,000+ social media posts** from **Twitter, Instagram, and Facebook APIs**.
   - Achieved **86.3% sentiment prediction accuracy** and **20% improvement** in engagement prediction using **NLP (NLTK, TF-IDF, Logistic Regression)**.

Encryptix – Artificial Intelligence Intern| July 2024 – August 2024 | Remote

- Developed an **AI chatbot** using **Python and NLP**, achieving an **80% response relevance rate** on test data.
- Integrated **conversation logging** and **sentiment detection** modules, improving interaction quality by **25%**.
- Collaborated remotely using **GitHub** and **Google Colab**, delivering all project milestones **2 weeks ahead of schedule**.

PROJECTS

1. **EMRS School Website (In Progress)**
   - Leading a **team of 3 developers** to build a full-featured school portal using **Flask** and **Django**.
   - Designed a **responsive UI** achieving **98% Lighthouse accessibility score**.
   - Integrated **MySQL** and **MongoDB** for secure data storage, achieving **25% faster query execution**.
2. **Amazon ML Challenge 2025 (Participated)**
   - Worked with a dataset of **75K samples** to train and optimize predictive models.
   - Achieved a **10% improvement in model accuracy** via **hyperparameter tuning** and **feature scaling**.
   - Collaborated using **Jupiter Notebook, Pandas, and Scikit-learn** to deliver a competitive solution within deadlines.

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML5, CSS, JavaScript
Frameworks & Libraries: Pandas, NumPy, Flask, Django, ReactJS
Tools: MS Office, Power BI, Azure, Excel, MySQL
Platforms: Jupiter Notebook, Visual Studio Code

SOFT SKILLS - Leadership | Time Management | Teamwork | Communication | Decision Making | Problem Solving

CERTIFICATIONS

- Web Development Internship – **Learn Fusion**
- Artificial Intelligence Internship – **Encryptix**
